

## Abstract Application form:

Please complete the abstract form provided and submit to [posterapplication@umcsn.com](mailto:posterapplication@umcsn.com)

- It is essential to keep nonstandard abbreviations/acronyms to a minimum for readability and understanding, with the abbreviation first written in full.
- Do not include tables, figures, or graphs in the abstract.

### Title

The abstract title conveys the content/subject of the poster. The title may be written as a question, or the title may be written to suggest the conclusions, if appropriate. If this is an IRB-approved poster, please use the same title as on your IRB application.

### Background

Background information provides a way for the reader to understand the topic, provide relevant or historic details. It gives an overall idea of what to expect from the rest of the poster presentation.

### Purpose

The introductory sentence(s) may be stated as a hypothesis, a purpose, an objective, or current evidence for a finding.

- A hypothesis is a supposition or conjecture used as a basis for further investigations.
- The purpose is a statement of the reason for conducting a project or reporting on a program, process, or activity.
- An objective is a result that the author is trying to achieve by conducting a project, program, process, or activity.

**Methods**

Briefly describe the methods of the project to define the data or population, outcome variables, analytic techniques, and data collection procedures and frequencies.

**Results**

The results should be concise to support only the purpose, objectives, hypothesis, or conclusions.

## Conclusions

The conclusion(s) should highlight the project's impact and follow the methods and results in a logical fashion. This section should not restate results. Instead, the significance of the results and their potential role in managing the project should be emphasized. New information or conclusions not supported by data in the results section should be avoided.
